

DATASHEET

Fuelfix & Tanks2Go T200 Self-Bunded Tank

With its 200,000-litre capacity, this unique fuel storage solution meets the most demanding operational fuel needs. A proven performer in the harshest mine-site environments, the T200 can be deployed and installed by our highly experienced team, no matter how remote.

Movable

Safe handling and transportation is easily achieved using a crane and flat deck. Locally manufactured in Australia. Modular design to reduce on-site installation time.

Accessible

Tanker unloading and dispensing bays can be located at opposite ends of the tank to provide safer and more efficient on-site traffic management flows. Tanker unloading and dispensing equipment can be fully customised.

Efficient

Pioneered by Fuelfix, the T200 is the largest self-bunded fuel tank on the market and has a proven track record of providing an innovative and cost-effective solution for high throughput refuelling locations. The T200's capacity enables cost effective full tanker load deliveries and enhances fuel supply security risk for remote locations. Installing at in-pit mining locations significantly enhances heavy vehicle productivity while also reducing running costs.

Environment-Friendly

Secondary containment of the T200 tank is compliant with AS1940 (2017), with associated equipment located on Fuelfix Spill Grates for bunding purposes.

Gross Capacity: 215,020L	Height: 4,908 mm
Safe Fill: 200,000L	Length: 15,100 mm
Weight (Empty): 29,400 kg	Diameter: 4,340 mm
Weight (Full Tank): 197,400 kg	Australian Standards: AS1940, AS1692, AS1657

These specifications are subject to variation. Please contact the Fuelfix Sales team for more information.

Standard Fittings

2 x 9 kg dry powder extinguisher, vent pipe and calibrated dipstick, 100 mm fill line with mechanical overfill prevention valve, 100 mm suction line with anti-siphon valve and audible overfill alarm. Ladder, ladder cage (where applicable) and platform built to AS1657.

Optional Equipment

- Various electric and diesel-powered tanker unloading and dispensing solutions to suit all applications
- Fuelfix fuel management system and tank gauging system (or customer nominated system)
- Spill Grates for truck unloading and dispensing bays
- 1,000L generator day tank
- Emergency Shower and Eyewash Station
- NMI approved meter
