Automatic Nozzles with Swivel

Diesel 140lpm

A high quality, heavy duty automatic shut off diesel nozzle approved for refuelling in resale pumping applications as well as flammable environments. With a maximum flow rate of 140 litres per minute, this is a high flow fuel nozzle designed for applications where large volumes of diesel or petrol need to be dispensed at a time.

Designed to automatically shut off when the vehicle tank is full, this fuel nozzle prevents an overspill situation from occurring. The nozzle also benefits from a two position stay open latch and is supplied as standard with guard for safety and durability.

Flow Rate: 140LPM	Fluids: Diesel / Petrol
Max Pressure: 3.5	Spout OD: 19mm
Inlet: 1" F	

Technical Details:

Nozzle with automatic shut-off, 2 position stay open latch, ATEX, EN13012 and TUV-SUD approved.

These specifications are subject to variation. Please contact the Fuelfix Sales team for more information.
