Fuelfix & Tanks2Go Automatic Nozzles (ADBLUE®)

The Automatic Shut Off Fuelfix AdBlue™ Nozzle is designed to dispense urea – otherwise known as DEF. The nozzles' spout sensors will only allow fluid to pass once it has been magnetically opened by the AdBlue™ tank. These nozzles are designed to prevent misfilling AdBlue™ into a diesel tank and they will therefore only work in this configuration.

Flow Rate: 40LPM	Inlet: 3/4"
Max Pressure: 3.5	Spout OD: 19mm

Technical Details:

Nozzle with automatic shut-off, check valve, 2-speed lever latch with removable latch pin EB 280, and strainer EK 172.

These specifications are subject to variation. Please contact the Fuelfix Sales team for more information.
