Fuelfix & Tanks2Go Small Fleet Dispensing Solution

The small fleet refuelling solution is ideal for portable diesel transfer applications including bulk tank, service truck or utility vehicle applications. This pump unit is supplied with a high flow 12V, 24V or 240V pump, mechanical flow meter, 4m delivery hose and an automatic nozzle. This unit is a complete solution and can be easily mounted near or on your diesel tank. It is ideal for easy refuelling of your fleet.

✓ Easy Operation

This pump kit is installed with an automatic nozzle and resettable meter.

✓ Easy to Read Display

The mechanical meter has a large and easy to read display that is resettable.

✓ Easy to Fit

The pump kit comes with an easy to mount, heavy-duty plate or can be mounted directly to the tank.

Flow Rate: 60L/min	Fluid: Diesel
Duty Cycle: 30 minutes	Current: 28 amps
Inlet/Outlet: 1" BSPP (F)	Max Suction lift: 2m

These specifications are subject to variation (flow rates vary by model). Please contact the Fuelfix Sales team for more information.
